TECHNICAL SKILLS

- HTML, CSS, JavaScript
- Python

- Firebase, SQL
- Java, C (in-progress)

TECHNICAL PROJECTS

Personal Website
(Independent Project)

December 2021

A personal website that uses HTML, CSS, JavaScript, the DOM, and Node.JS to deliver a unique user experience.

https://github.com/coolhandwilson/PersonalWebsite

Glimmer
(Independent Project)

November 2021

A text-based Role-Playing Game made with Python. It allows users to choose their character, explore a 2-D dungeon, find magic items, and level-up through combat. It utilizes many of Python's built-in functions and modules.

News Tycoon
(Group Project)

November 2021

A web-based game designed to teach users how to spot misinformation. The game was built using HTML, CSS, JavaScript, and Firebase. My role was to create the CSS and the JavaScript for the game's user interface and functionality.
